32. Societies Ranked by Percentage of Population Served, Mar. 1983	54

The breakdown by the Ministry's four regions showed increases in quarterly averages of beneficiaries in all regions, ranging from a low of 17.2 percent in the southwestern region to a high of 25.4 percent in both northern and central regions. The overall increase in beneficiaries was 25.4 percent. The municipalities, however, showed much higher increases. In all regions, the largest (35.9 percent) came in the northern region and the lowest (31.2 percent) in the southwestern region. Total quarterly expenditures amounted to \$10.3 million or 25.3 percent more than the comparable quarter ending March 1982.

Supplementary AID programs reported an overall increase of 23.2 percent in quarterly averages of beneficiaries. However, the regional breakdown showed increases of slightly more than fifty percent in the central and southwestern regions, 28.6 percent in the southeastern region and only 2.1 percent in the northern region. Total quarterly expenditures increased by 22.6 percent.

Quarterly averages of beneficiaries under the Mental Health program showed an overall increase of 29.4 percent. However, the regional averages varied widely. The central region reported a 170.4 percent increase; the southwestern region 57.5 percent; the northern region 2.1 percent; while the southeastern region showed an 8.3 percent decline. Total quarterly expenditures increased by 29.6 percent.

In relation to the population in Ontario, General Assistance beneficiaries constituted an average 2.4 percent in March 1983. This varied from a low of 0.7 percent in Nelson to a high of 4.3 percent in Windsor.

## General Assistance

General Assistance data provided in the Bulletin cover municipalities with population in excess of 20,000 and all county and district administration boards. Together, they account for about 86 percent of the total caseload in Ontario.

The caseload in March 1983 was 108,309 or 33.7 percent higher than in March 1982. The largest increases were reported in the employable category, showing 84.3 percent for single males and 59.1 percent for male headed family units. Female headed family units increased by 47.5 percent and single females - 55.1 percent. In the unemployable category, there was a 21.3 percent decline among female headed family units and the increases of 3.2 percent among single females, followed by 10.0 and 11.4 percent among male headed family units and single males respectively.

Twelve-months cumulative expenditures ending March 1983 amounted to \$319.6 million or 40.0 percent more than the previous twelve months ending March 1982.

The breakdown by the Ministry's four regions showed increases in quarterly averages of beneficiaries in all regions, ranging from a low of 17.3 percent in the Southeastern Region to a high of 36.4 percent in both Northern and Central Regions. The overall increase in beneficiaries was 30.4 percent. The expenditures, however, showed much higher increases in all regions, the largest (54.9 percent) being in the Northern Region and the lowest (31.2 percent) in the Southeastern Region. Total quarterly expenditures amounted to \$100.5 million or 46.5 percent more than the comparable quarter ending March 1982.

Supplementary Aid program reported an overall increase of 39.6 percent in quarterly averages of beneficiaries. However, the regional breakdown showed increases of slightly more than fifty percent in the Central and Southeastern Regions, 24.0 percent in the Southwestern Region and only 2.1 percent in the Northern Region. Total quarterly expenditures increased by 42.6 percent.

Quarterly averages of beneficiaries under the Special Assistance program showed an overall increase of 69.6 percent. However, the regional averages varied widely. The Central Region reported a 170.9 percent increase; the Southeastern Region - 57.5 percent; the Northern Region 5.1 percent; while the Southwestern Region showed an 8.9 percent decline. Total quarterly expenditures increased by 39.6 percent.

In relation to the population in Ontario, General Assistance beneficiaries constituted an average 2.4 percent in March 1983. This ranged from a low of 0.7 percent in Halton to a high of 4.8 percent in Windsor.

### Family Benefits

Family Benefits statistics cover the same units as General Assistance, but with the addition of unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in March 1983 was 128,769 or 7.3 percent higher than in March 1982. More specifically, there was a substantial increase among recipients covered under the Guaranteed Annual Income System (GAINS), ranging from 118.0 percent for singles to 223.9 and 226.0 percent for couples and families with children respectively. This was at the expense of the category without GAINS, which showed declines of 77.4 percent for singles and 84.2 for couples.

Twelve-months cumulative expenditures ending March 1983 amounted to \$584.2 million or 15.2 percent more than the previous 12 months ending March 1982.

The overall average of beneficiaries as a percentage of population in Ontario was 2.8 percent in March 1983. This ranged from a low of 1.0 percent in Peel to a high of 7.2 percent in Nipissing (excluding North Bay). In the largest administrative units, Toronto, at 2.6 percent, and Ottawa-Carleton, at 2.3 percent, were slightly below the provincial average, while Hamilton-Wentworth, at 4.0 percent, was well above.

The combination of Family Benefits and General Welfare Assistance beneficiaries as a percentage of population in Ontario refers only to the 54 largest units reported in the General Assistance Section. In March 1983, the overall average was 5.2 percent, ranging from a low of 1.8 percent in Halton to a high of 11.4 percent in Nipissing (excluding North Bay).

### Child Welfare

In March 1983, the children in care numbered 11,659 or 4.7 percent less than in March 1982. Children under protection and prevention numbered 39,877 or 0.8 percent more than in the same month of the last year.

Distribution of children by wardship showed declines of 8.5 percent in crown wards, 7.5 percent in society wards and 3.9 percent in non-wards.

A breakdown for the 51 societies showed an average 0.5 percent of children in care of the estimated population under the age of 18. The Northern Region, at 0.8 percent, was above the provincial average; the Western Region, at 0.4 percent, was slightly below and the Central and Eastern Regions, both at 0.5 percent, were at the provincial average.

When protection and prevention services on children were included, the beneficiaries as a percentage of population ranged from a low of 0.2 percent in York to a high of 2.1 percent in Kenora. The overall average was 0.6 percent.

## General Welfare Assistance

### Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 86 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This is done to give more reliable comparisons than the respective comparisons of individual months in other tables.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

## Family Benefits

### Notes

The Family Benefits Act covers people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 86 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster Parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

TABLE 12. FAMILY BENEFITS CASES AND DEPENDENTS, MAR 1982 - MAR 1983

## Child Welfare

### NOTES:

The Child Welfare Act is administered by the 51 Children's Aid Societies with funds from the provincial and municipal governments. Generally, each Society serves one or more counties or districts, with an exception of Cochrane where two Societies - the Kapuskasing C.A.S. and the Porcupine C.A.S. serve the District. The other exceptions are Essex, Hamilton and Toronto. The first two have second Societies which are Catholic, while in Toronto there is also the Jewish Family and Child Services.

Starting with the January-March 1982 Bulletin, Child Welfare data are extracted from the reports provided by the C.A.S. Quarterly Reporting System (Q.R.S.). They replaced C.A.S. Monthly Statistical Report (M.S.R.) in a somewhat revamped form, yet providing a good basis for comparison of trends.

At present, only six tables are provided in this Bulletin. They reflect the format and content of the previously published data in Tables 27, 29, 31, 33, 34 and 35. Replacements for tables 28, 30 and 32 are not yet available, but will be included in the Bulletin in the future.

All tables are subject to later corrections and adjustments, and should be read as approximations which give general indications of volumes and trends.

TABLE 27. CHILD WELFARE CASES, MAR 1982 - MAR 1983

## General Assistance

General Assistance data provided in the Bulletin cover municipalities with populations in excess of 20,000 and all county and district administration boards. Together, they account for about 86 percent of the total caseload in Ontario.

The caseload in June 1983 was 100,082 or 32.3 percent higher than in June 1982. The largest increases were reported in the employable category, showing 51.1 percent for male headed family units, 57.7 percent for single females, 80.2 percent for single males and 27.5 percent for female headed family units. In the unemployable category, there was a 12.7 percent decline among female headed family units and a moderate increase (5.6 to 14.5 percent) among other groups.

Twelve-months cumulative expenditures ending June 1983 amounted to \$350.1 million or 44.7 percent more than the previous twelve months ending June 1982.

The breakdown by the Ministry's four regional offices showed increases in quarterly averages of beneficiaries in all regions, ranging from a 16.7 percent in the Southeastern Region to 42.4 percent in the Northern Region. The overall increase in beneficiaries was 30.5 percent. The expenditures, however, showed much higher increases in all regions, the largest (58.4 percent) being in the Northern Region and the lowest (31.3 percent) being in the Southeastern Region. Total quarterly expenditures increased by 45.5 percent.

Supplementary Aid showed an overall increase of 3.2 percent in quarterly averages of beneficiaries. However, the regional breakdown reported a 38.2 percent increase in the Southeastern Region; and declines of 18.6 percent in the Northern Region, 5.4 percent in the Southwestern and 7.2 percent in the Central Region. Total quarterly expenditures increased by 5.3 percent.

Quarterly averages of beneficiaries under the Special Assistance program showed an overall increase of 14.4 percent. However, the percentage changes by regions varied widely. The Central and Southeastern Regions reported increases of 43.2 and 0.5 percent respectively; while the Northern Region showed a 6.6 percent decline and the Southwestern Region a 23.8 percent decline. Total quarterly expenditures increased by 42.6 percent.

In relation to the population in Ontario, General Assistance beneficiaries constituted an average of 2.1 percent in June 1983. This ranged from a low of 0.6 percent in Perth, Halton, Huron, Prince Edward, York and Rainy River to a high of 4.9 percent in Sault Ste Marie.

### Family Benefits

Family Benefits statistics cover the same units as General Assistance, but with the addition of unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in June 1983 was 131,563 or 7.5 percent higher than in June 1982. More specifically, there was a substantial increase among recipients covered under the Guaranteed Annual Income System (GAINS), ranging from 93.7 percent for singles to 184.2 percent for couples without children. This was at the expense of the category without GAINS which showed declines of 74.8 percent for singles and 82.4 for couples without children.

Twelve-months cumulative expenditures ending June 1983 amounted to \$608.0 million or 15.5 percent more than the previous 12 months ending June 1982.

The overall average of beneficiaries as a percentage of population in Ontario was 2.9 percent in June 1983. This ranged from a low of 1.1 percent in Peel and York to a high of 7.4 percent in Nipissing (excluding North Bay) and 7.2 percent in Manitoulin. In the largest administrative units, Toronto, at 2.6 percent, and Ottawa-Carleton, at 2.3 percent, were slightly below the provincial average, while Hamilton-Wentworth, at 4.1 percent, was well above.

The combination of Family Benefits and General Welfare Assistance beneficiaries as a percentage of population in Ontario refers only to the 54 largest units covered in the General Assistance Section. In June 1983, the overall average was 5.0 percent, ranging from a low of 1.7 percent in Halton and York to a high of 10.7 percent in Nipissing (excluding North Bay).

### Child Welfare

In June 1983, the children in care numbered 11,636 or 3.7 percent less than in June 1982, while children under protection and prevention services increased by 1.8 percent.

Distribution of children by wardship showed declines of 6.6 and 4.5 percent in crown wards and society wards respectively; while non-wards increased by 2.8 percent.

A breakdown of the 51 societies showed an average 0.5 percent of children in care of the estimated population under the age of 18. The Northern Region, at 0.8 percent, was above the provincial average; the Southwestern Region, at 0.4 percent, was slightly below, and the Central and Southeastern Regions, both at 0.5 percent, were at the provincial average.

When protection and prevention services on children were included, the beneficiaries as a percentage of total estimated population ranged from a low of 0.2 percent in York to a high of 2.2 percent in Kenora. The overall average was 0.6 percent.

## General Welfare Assistance

### Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 86 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This presents more reliable comparisons than the respective comparisons of individual months in other tables.

All tables in this part are based on unaudited figures as provided by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

## Family Benefits

### Notes

The Family Benefits Act is administered directly by the Ministry and covers people who are likely to need long term social assistance. This programme includes the disabled and families where the father is absent or disabled.

The tables give figures for the same municipal units which cover about 86 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e. all family members who are included in the payment calculations. Foster Parents are not counted as beneficiaries but are providing care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under- and overpayments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Please Note: Effective this publication, April to June 1983, the four work incentive program tables published in the past will not be included as the information is currently unavailable.

## Child Welfare

### Notes

The Child Welfare Act is administered by the 51 Children's Aid Societies with funds from the provincial and municipal governments. Generally, each Society serves one or more counties or districts, with the exception of Cochrane where two Societies, Kapuskasing C.A.S. and Porcupine C.A.S., serve the District. The other exceptions are Essex, Hamilton and Toronto each having second societies which are Catholic. Toronto also has a third society which is the Jewish Family and Child Services.

Beginning with the January-March 1982 Bulletin, Child Welfare data is now being extracted from reports provided by the C.A.S. Quarterly Reporting System, which replaces the new obsolete C.A.S. monthly statistical report (form V).

All tables are subject to later corrections and adjustments, and should be read as approximations which give general indications of volumes and trends.

## HIGHLIGHTS

### General Assistance

General Assistance data provided in the Bulletin cover municipalities with populations in excess of 20,000 and all county and district administration boards. Together, they account for about 86 percent of the total caseload in Ontario.

The caseload in Sept. 1983 was 92,219 or 15.0 percent higher than in Sept. 1982. The largest increases were reported in the employable category, showing 35.1 percent for single males, 32.1 percent for single females, 20.7 percent for male headed family units and 13.3 percent for female headed family units. In the unemployable category, there was a 19.4 percent decline among female headed family units and a moderate increase (5.7 to 11.5 percent) among other groups.

Twelve-months cumulative expenditures ending Sept. 1983 amounted to \$371.2 million or 42.6 percent more than the previous twelve months ending Sept. 1982.

The breakdown by the Ministry's four regional offices showed increases in quarterly averages of beneficiaries in all regions, ranging from a low of 5.4 percent in the Southeastern Region to a high of 30.9 percent in the Northern Region. The overall increase in beneficiaries was 16.1 percent. The expenditures, however, showed much higher increases in all regions, the largest (45.3 percent) being in the Northern Region and the lowest (16.8 percent) being in the Southeastern Region. Total quarterly expenditures increased by 31.2 percent.

Supplementary Aid showed an overall increase of 19.6 percent in quarterly averages of beneficiaries. The regional breakdown reported increases of 39.6 percent in the Central Region, 39.0 percent in the Southeastern Region and 15.7 percent in the Southwestern Region. However, a decrease of 13.7 percent was reported in the Northern Region. Total quarterly expenditures increased by 4.6 percent.

Quarterly averages of beneficiaries under the Special Assistance program showed an overall increase of 51.5 percent. Increases were reported in all regions with the Southwestern Region at 60.8 percent, the Central Region at 24.9 percent, the Southeastern Region at 19.7 and the Northern Region at 14.5. Total quarterly expenditures increased by 55.7 percent.

In relation to the population in Ontario, General Assistance beneficiaries constituted an average of 2.0 percent in Sept. 1983. This ranged from a low of 0.5 percent in Halton and York to a high of 4.8 percent in Sault Ste. Marie.

### Family Benefits

Family Benefits statistics cover the same units as General Assistance, but with the addition of unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in Sept, 1983 was 134,550 or 8.7 percent higher than in Sept. 1982. More specifically, there was a substantial increase among recipients covered under the Guaranteed Annual Income System (GAINS), ranging from 100.3 percent for singles to 203.2 percent for couples. This was at the expense of the category without GAINS which showed declines of 75.4 percent for singles and 83.0 percent for couples.

Twelve-months cumulative expenditures ending Sept. 1983 amounted to \$633.1 million or 15.6 percent more than the previous 12 months ending Sept. 1982.

The overall average of beneficiaries as a percentage of population in Ontario was 2.9 percent in Sept. 1983. This ranged from a low of 1.1 percent in York to a high of 7.2 percent in Nipissing (excluding North Bay). In the largest administrative units, Toronto, at 2.8 percent, and Ottawa-Carleton, at 2.4 percent, were slightly below the provincial average, while Hamilton-Wentworth, at 4.1 percent, was well above.

The combination of Family Benefits and General Welfare Assistance beneficiaries as a percentage of population in Ontario refers only to the 54 largest units covered in the General Assistance Section. In Sept. 1983, the overall average was 4.9 percent, ranging from a low of 1.6 percent in York to a high of 10.3 percent in Nipissing (excluding North Bay).

### Child Welfare

In Sept. 1983, the children in care numbered 11,246 or 3.7 percent less than in Sept. 1982, while children under protection and prevention services increased by 5.3 percent.

Distribution of children by wardship showed declines of 6.7 and 3.6 percent in crown wards and society wards respectively; while non-wards increased by 2.2 percent.

A breakdown of the 51 societies showed an average 0.5 percent of children in care of the estimated population under the age of 18. The Northern Region, at 0.8 percent, was above the provincial average; the Southwestern Region, at 0.4 percent, was slightly below, and the Central and Southeastern Regions, both at 0.5 percent, were at the provincial average.

When protection and prevention services on children were included, the beneficiaries as a percentage of total estimated population ranged from a low of 0.2 percent in York to a high of 2.2 percent in Kenora. The overall average was 0.6 percent.

## PART I

### GENERAL WELFARE ASSISTANCE

#### Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 86 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This presents more reliable comparisons than the respective comparisons of individual months in other tables.

All tables in this part are based on unaudited figures as provided by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

## PART II

### FAMILY BENEFITS

#### Notes

The Family Benefits Act is administered directly by the Ministry and covers people who are likely to need long term social assistance. This programme includes the disabled and families where the father is absent or disabled.

The tables give figures for the same municipal units which cover about 86 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e. all family members who are included in the payment calculations. Foster Parents are not counted as beneficiaries but are providing care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under- and overpayments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Please Note: Effective with the publications beginning April to June 1983, the four work incentive program tables published in the past will not be included as the information is currently unavailable.

## PART III

### CHILD WELFARE

#### Notes

The Child Welfare Act is administered by the 51 Children's Aid Societies with funds from the provincial and municipal governments. Generally, each Society serves one or more counties or districts, with the exception of Cochrane where two Societies, Kapuskasing C.A.S. and Porcupine C.A.S., serve the District. The other exceptions are Essex, Hamilton and Toronto each having second societies which are Catholic. Toronto also has a third society which is the Jewish Family and Child Services.

Beginning with the January-March 1982 Bulletin, Child Welfare data is now being extracted from reports provided by the C.A.S. Quarterly Reporting System, which replaces the now obsolete C.A.S. monthly statistical report (form V).

All tables are subject to later corrections and adjustments, and should be read as approximations which give general indications of volumes and trends.

## HIGHLIGHTS

### General Assistance

General Assistance data provided in the Bulletin cover municipalities with populations in excess of 20,000 and all county and district administration boards. Together, they account for about 86 percent of the total caseload in Ontario.

The caseload in December 1983 was 98,527 or 0.5 percent higher than in December 1982. In the employable category, increases of 5.2 percent for single males and 4.9 percent for single females were reported. For this same category, declines of 3.2 percent for male headed family units and 1.7 percent for female headed family units were reported. In the unemployable category, increases of 6.3 percent for single males, 4.2 percent for single females and 3.5 percent for male headed family units were reported, while a decrease of 23.8 percent was reported for female headed family units.

Twelve-months cumulative expenditures ending December 1983 amounted to \$379.1 million or 31.8 percent more than the previous twelve months ending December 1982.

The breakdown by the Ministry's four regional offices showed increases in quarterly averages of beneficiaries of 15.9 percent in Northern Region and 0.3 percent in the Southwestern Region. Decreases of 1.2 percent in the Southeastern Region and 9.8 percent in the Central Region were reported. There was an overall increase in beneficiaries of 0.5 percent. Expenditures showed increases ranging from 5.1 percent in the Southeastern Region to 10.5 percent in the Southwestern Region and 20.4 percent in the Northern Region. A decrease of 2.9 percent was reported in the Central Region. Total quarterly expenditures increased by 9.3 percent.

Supplementary Aid showed an overall increase of 20.1 percent in quarterly averages of beneficiaries. The regional breakdown reported increases of 81.0 percent in the Central Region, 28.4 percent in the Southwestern Region and 11.7 percent in the Southeastern Region. However, a decrease of 2.6 percent was reported in the Northern Region. Total quarterly expenditures increased by 45.8 percent.

Quarterly averages of beneficiaries under the Special Assistance program showed an overall increase of 3.8 percent. Increases of 13.2 percent in the Northern Region and 5.7 percent in the Southwestern Region were reported. Decreases of 6.8 percent in the Southeastern Region and 2.8 percent in the Central Region were reported. Total quarterly expenditures increased by 32.9 percent.

In relation to the population in Ontario, General Assistance beneficiaries constituted an average of 2.1 percent in December 1983. This ranged from a low of 0.5 percent in Halton to a high of 4.9 percent in Sault Ste. Marie.

### Family Benefits

Family Benefits statistics cover the same units as General Assistance, but with the addition of unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in December 1983 was 137,099 or 8.8 percent higher than in December 1982. More specifically, there was an increase among recipients covered under the Guaranteed Annual Income System (GAINS), ranging from 8.4 percent for singles to 14.2 percent for couples. The category without GAINS also showed increases ranging from 0.5 percent for singles to 10.3 percent for families with children.

Twelve-months cumulative expenditures ending December 1982 amounted to \$655.8 million or 16.9 percent more than the previous 12 months ending December 1982.

The overall average of beneficiaries as a percentage of the population in Ontario was 3.0 percent in December 1983. This ranged from a low of 1.1 percent in York to a high of 7.0 percent in Nipissing (excluding North Bay). In the largest administrative units, Toronto, at 2.9 percent, and Ottawa-Carleton, at 2.4 percent, were slightly below the provincial average, while Hamilton-Wentworth, at 4.1 percent, was well above.

The combination of Family Benefits and General Welfare Assistance beneficiaries as a percentage of the population in Ontario refers only to the 54 largest units covered in the General Assistance Section. In December 1983, the overall average was 5.1 percent, ranging from a low of 1.8 percent in York and Halton to a high of 10.8 percent in Nipissing (excluding North Bay).

### Child Welfare

In Dec. 1983, the children in care numbered 11,021 or 3.4 percent less than in Dec. 1982, and children under protection and prevention services decreased by 0.6 percent.

Distribution of children by wardship showed declines of 4.9 and 2.3 percent in crown wards and society wards respectively. Non-wards decreased by 1.6 percent.

A breakdown of the 51 societies showed an average 0.5 percent of children in care of the estimated population under the age of 18. The Northern Region, at 0.7 percent, was above the provincial average; the Southwestern Region, at 0.4 percent, was slightly below, and the Central and Southeastern Regions, both at 0.5 percent, were at the provincial average.

When protection and prevention services on children were included, the beneficiaries as a percentage of total estimated population ranged from a low of 0.2 percent in York to a high of 1.4 percent in Kapuskasing, Kenora, Prince Edward and Toronto Jewish Family and Children's Services. The overall average was 0.6 percent.

## PART I

### GENERAL WELFARE ASSISTANCE

#### Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 86 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This presents more reliable comparisons than the respective comparisons of individual months in other tables.

All tables in this part are based on unaudited figures as provided by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

## PART II

### FAMILY BENEFITS

#### Notes

The Family Benefits Act is administered directly by the Ministry and covers people who are likely to need long term social assistance. This programme includes the disabled and families where the father is absent or disabled.

The tables give figures for the same municipal units which cover about 86 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e. all family members who are included in the payment calculations. Foster Parents are not counted as beneficiaries but are providing care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under- and overpayments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Please Note: Effective with the publications beginning April to June 1983, the four work incentive program tables published in the past will not be included as the information is currently unavailable.

## PART III

### CHILD WELFARE

#### Notes

The Child Welfare Act is administered by the 51 Children's Aid Societies with funds from the provincial and municipal governments. Generally, each Society serves one or more counties or districts, with the exception of Cochrane where two Societies, Kapuskasing C.A.S. and Porcupine C.A.S., serve the District. The other exceptions are Essex, Hamilton and Toronto each having second societies which are Catholic. Toronto also has a third society which is the Jewish Family and Child Services.

Beginning with the January-March 1982 Bulletin, Child Welfare data is now being extracted from reports provided by the C.A.S. Quarterly Reporting System, which replaces the now obsolete C.A.S. monthly statistical report (form V).

All tables are subject to later corrections and adjustments, and should be read as approximations which give general indications of volumes and trends.

## HIGHLIGHTS

### General Assistance

General Assistance data provided in the Bulletin cover municipalities with populations in excess of 20,000 and all county and district administration boards. Together, they account for about 86 percent of the total caseload in Ontario.

The caseload in March 1984 was 105,458 or 2.6 percent lower than in March 1983. The largest decreases were reported in the employable category, showing 1.6 percent for single males, 1.6 percent for single females, 8.1 percent for male headed family units and 5.7 percent for female headed family units. In the unemployable category, there was a 21.2 percent decline among female headed family units and a moderate increase (4.5 to 5.7 percent) among other groups.

Twelve-months cumulative expenditures ending March 1984 amounted to \$385.8 million or 20.7 percent more than the previous twelve months ending March 1983.

The breakdown by the Ministry's four regional offices showed an increase in quarterly averages of beneficiaries of 5.8 percent in the Northern Region. The other three regions showed a decrease ranging from a low of 3.4 percent in the Southeastern Region to a high of 8.5 percent in the Central Region. The overall decrease in beneficiaries was 3.1 percent. The expenditures, however, showed increases in three regions, the largest (13.3 percent) being in the Northern Region and the lowest (6.9 percent) being in the Southeastern Region. The Central Region reported a decrease of 2.1 percent. Total quarterly expenditures increased by 6.6 percent.

Supplementary Aid showed an overall increase of 15.7 percent in quarterly averages of beneficiaries. The regional breakdown reported increases of 37.1 percent in the Central Region, 18.1 percent in the Northern Region, 16.8 percent in the Southwestern Region and 9.8 percent in the Southeastern Region. Total quarterly expenditures increased by 22.2 percent.

Quarterly averages of beneficiaries under the Special Assistance program showed an overall decrease of 6.0 percent. Decreases of 3.4 percent in the Southwestern Region, 7.4 percent in the Central Region and 24.3 percent in the Southeastern Region were reported however, in the Northern Region, an increase of 22.6 percent was reported. Total quarterly expenditures increased by 37.3 percent.

In relation to the population in Ontario, General Assistance beneficiaries constituted an average of 2.2 percent in March 1984. This ranged from a low of 0.5 percent in Halton to a high of 5.1 percent in Sault Ste. Marie.

### Family Benefits

Family Benefits statistics cover the same units as General Assistance, but with the addition of unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in March 1984 was 140,545 or 9.1 percent higher than in March 1983. More specifically, there was an increase among recipients covered under the Guaranteed Annual Income System (GAINS), ranging from 6.3 percent for families with children to 16.7 percent for couples. This was at the expense of the category without GAINS which showed declines of 2.1 percent for singles and 3.6 percent for couples.

Twelve-months cumulative expenditures ending March 1984 amounted to \$680.4 million or 16.5 percent more than the previous 12 months ending March 1983.

The overall average of beneficiaries as a percentage of the population in Ontario was 3.0 percent in March 1984. This ranged from a low of 1.1 percent in York to a high of 7.1 percent in Nipissing (excluding North Bay). In the largest administrative units, Toronto, at 3.0 percent was at the provincial average, Ottawa-Carleton, at 2.4 percent, was slightly below the provincial average, and Hamilton-Wentworth, at 4.2 percent, was well above.

The combination of Family Benefits and General Welfare Assistance beneficiaries as a percentage of the population in Ontario refers only to the 54 largest units covered in the General Assistance Section. In March 1984, the overall average was 5.3 percent, ranging from a low of 1.8 percent in Halton to a high of 11.9 percent in Nipissing (excluding North Bay).

### Child Welfare

In March 1984, the children in care numbered 11,368 or 2.5 percent less than in March 1983, and children under protection and prevention services decreased by 2.3 percent.

Distribution of children by wardship showed declines of 4.3 and 2.2 percent in crown wards and non-wards respectively; while society wards increased by 1.5 percent.

A breakdown of the 51 societies showed an average 0.5 percent of children in care of the estimated population under the age of 18. The Northern Region, at 0.8 percent, was above the provincial average, while the Southwestern Region, the Central Region and Southeastern Regions, all at 0.5 percent, were at the provincial average.

When protection and prevention services on children were included, the beneficiaries as a percentage of total estimated population ranged from a low of 0.2 percent in York to a high of 1.6 percent in Prince Edward. The overall average was 0.6 percent.

## PART I

### GENERAL WELFARE ASSISTANCE

#### Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 86 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This presents more reliable comparisons than the respective comparisons of individual months in other tables.

All tables in this part are based on unaudited figures as provided by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

## PART II

### FAMILY BENEFITS

#### Notes

The Family Benefits Act is administered directly by the Ministry and covers people who are likely to need long term social assistance. This programme includes the disabled and families where the father is absent or disabled.

The tables give figures for the same municipal units which cover about 86 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e. all family members who are included in the payment calculations. Foster Parents are not counted as beneficiaries but are providing care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under- and overpayments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Please Note: Effective with the publications beginning April to June 1983, the four work incentive program tables published in the past will not be included as the information is currently unavailable.

## PART III

### CHILD WELFARE

#### Notes

The Child Welfare Act is administered by the 51 Children's Aid Societies with funds from the provincial and municipal governments. Generally, each Society serves one or more counties or districts, with the exception of Cochrane where two Societies, Kapuskasing C.A.S. and Porcupine C.A.S., serve the District. The other exceptions are Essex, Hamilton and Toronto each having second societies which are Catholic. Toronto also has a third society which is the Jewish Family and Child Services.

Beginning with the January-March 1982 Bulletin, Child Welfare data is now being extracted from reports provided by the C.A.S. Quarterly Reporting System, which replaces the now obsolete C.A.S. monthly statistical report (form V).

All tables are subject to later corrections and adjustments, and should be read as approximations which give general indications of volumes and trends.

## HIGHLIGHTS

### General Assistance

General Assistance data provided in the Bulletin cover municipalities with populations in excess of 20,000 and all county and district administration boards. Together, they account for about 86 percent of the total caseload in Ontario.

The caseload in June 1984 was 95,381 or 4.7 percent less than in June 1983. The largest decreases were reported in the employable category, showing 7.5 percent for single males, 2.3 percent for single females, 11.5 percent for male headed family units and 2.5 percent for female headed family units. In the unemployable category, there was a 20.3 percent decline among female headed family units and a moderate increase (3.1 to 4.1 percent) among other groups.

Twelve-months cumulative expenditures ending June 1984 amounted to \$388.8 million or 11.1 percent more than the previous twelve months ending June 1983.

The breakdown by the Ministry's four regional offices showed decreases in quarterly averages of beneficiaries in all regions, ranging from a low of 3.5 percent in the Southeastern Region to a high of 12.8 percent in the Northern Region. The overall decrease in beneficiaries was 7.8 percent. The expenditures, however, showed increases in all regions, the largest (7.5 percent) being in the Southeastern Region and the lowest (1.4 percent) being in the Central Region. Total quarterly expenditures increased by 3.1 percent.

Supplementary Aid showed an overall increase of 27.0 percent in quarterly averages of beneficiaries. The regional breakdown reported increases of 4.6 percent in the Southeastern Region, 13.6 percent in the Central Region, 24.5 percent in the Northern Region and 40.4 percent in the Southwestern Region. Total quarterly expenditures increased by 28.3 percent.

Quarterly averages of beneficiaries under the Special Assistance program showed an overall increase of 28.0 percent. Increases of 9.0 percent was reported in the Northern Region, 27.0 percent in the Southeastern Region and 30.0 percent in the Southwestern Region. The Central Region reported a decrease of 7.5 percent. Total quarterly expenditures increased by 14.7 percent.

In relation to the population in Ontario, General Assistance beneficiaries constituted an average of 2.0 percent in June 1984. This ranged from a low of 0.5 percent in Halton to a high of 4.7 percent in Sault Ste. Marie.

### Family Benefits

Family Benefits statistics cover the same units as General Assistance, but with the addition of unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in June 1984 was 143,438 or 9.0 percent higher than in June 1983. More specifically, there was a substantial increase among recipients covered under the Guaranteed Annual Income System (GAINS), ranging from 11.1 percent for singles to 18.4 percent for couples. This was at the expense of the category without GAINS which showed declines of 2.7 percent for singles and 6.2 percent for couples.

Twelve-months cumulative expenditures ending June 1984 amounted to \$705.3 million or 16.1 percent more than the previous 12 months ending June 1983.

The overall average of beneficiaries as a percentage of the population in Ontario was 3.1 percent in June 1984. This ranged from a low of 1.2 percent in York to a high of 7.3 percent in Manitoulin. In the largest administrative units, Ottawa-Carleton at 2.5 percent, was slightly below the provincial average, while Hamilton-Wentworth, at 4.3 percent, was well above. Toronto at 3.1 percent was at the provincial average.

The combination of Family Benefits and General Welfare Assistance beneficiaries as a percentage of the population in Ontario refers only to the 54 largest units covered in the General Assistance Section. In June 1984, the overall average was 5.1 percent, ranging from a low of 1.8 percent in Halton to a high of 10.6 percent in Nipissing (excluding North Bay).

### Child Welfare

In June 1984, the children in care numbered 11,204 or 3.7 percent less than in June 1983. Children under protection and prevention services also showed a decrease of 0.3 percent.

Distribution of children by wardship showed declines of 6.6 and 3.0 percent in crown wards and non-wards respectively; while society wards increased by 1.7 percent.

A breakdown of the 51 societies showed an average 0.5 percent of children in care of the estimated population under the age of 18. The Northern Region, at 0.8 percent, was above the provincial average, the Southwestern Region, at 0.4 percent, was slightly below, and the Central and Southeastern Regions, both at 0.5 percent, were at the provincial average.

When protection and prevention services on children were included, the beneficiaries as a percentage of total estimated population ranged from a low of 0.2 percent in York to a high of 1.5 percent in the Toronto Jewish Family and Children Services. The overall average was 0.6 percent.

## PART I

### GENERAL WELFARE ASSISTANCE

#### Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 86 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This presents more reliable comparisons than the respective comparisons of individual months in other tables.

All tables in this part are based on unaudited figures as provided by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

## PART II

### FAMILY BENEFITS

#### Notes

The Family Benefits Act is administered directly by the Ministry and covers people who are likely to need long term social assistance. This programme includes the disabled and families where the father is absent or disabled.

The tables give figures for the same municipal units which cover about 86 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e. all family members who are included in the payment calculations. Foster Parents are not counted as beneficiaries but are providing care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under- and overpayments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Please Note: Effective with the publications beginning April to June 1983, the four work incentive program tables published in the past will not be included as the information is currently unavailable.

## PART III

### CHILD WELFARE

#### Notes

The Child Welfare Act is administered by the 51 Children's Aid Societies with funds from the provincial and municipal governments. Generally, each Society serves one or more counties or districts, with the exception of Cochrane where two Societies, Kapuskasing C.A.S. and Porcupine C.A.S., serve the District. The other exceptions are Essex, Hamilton and Toronto each having second societies which are Catholic. Toronto also has a third society which is the Jewish Family and Child Services.

Beginning with the January-March 1982 Bulletin, Child Welfare data is now being extracted from reports provided by the C.A.S. Quarterly Reporting System, which replaces the now obsolete C.A.S. monthly statistical report (form V).

All tables are subject to later corrections and adjustments, and should be read as approximations which give general indications of volumes and trends.

## HIGHLIGHTS

### General Assistance

General Assistance data provided in the Bulletin cover municipalities with populations in excess of 20,000 and all county and district administration boards. Together, they account for about 86 percent of the total caseload in Ontario.

The caseload in September 1984 was 89,794 or 2.6 percent lower than in September 1983. The largest decreases were reported in the employable category, showing 1.5 percent for single males, 1.3 percent for single females, 7.7 percent for male headed family units and 3.5 percent for female headed family units. In the unemployable category, there was a 14.1 percent decline among female headed family units and a moderate increase (0.9 to 3.5 percent) among other groups.

Twelve-months cumulative expenditures ending September 1984 amounted to \$392.9 million or 5.8 percent more than the previous twelve months ending September 1983.

The breakdown by the Ministry's four regional offices showed an increase in quarterly averages of beneficiaries of 1.8 percent in the Southeastern Region. The other three regions all showed decreases ranging from 0.5 in the Central Region to 6.3 in the Southwestern Region. The overall decrease in beneficiaries was 4.0 percent. The expenditures, however, showed increases in all regions, the largest (11.8 percent) being in the Southeastern Region and the lowest (2.3 percent) being in the Southwestern Region. Total quarterly expenditures increased by 4.6 percent.

Supplementary Aid showed an overall increase of 20.4 percent in quarterly averages of beneficiaries. The regional breakdown reported increases of 27.7 percent in the Southwestern Region, 27.2 percent in the Central Region, 15.2 percent in the Northern Region and 4.5 percent in the Southeastern Region. Total quarterly expenditures increased by 42.4 percent.

Quarterly averages of beneficiaries under the Special Assistance program showed an overall decrease of 6.9 percent. Decreases were reported in the Southwestern Region at 8.8 percent and the Northern Region at 11.1 percent; while increases were reported in the Southeastern Region at 4.0 percent and the Central Region at 4.7 percent. Total quarterly expenditures increased by 17.0 percent.

In relation to the population in Ontario, General Assistance beneficiaries constituted an average of 1.9 percent in September 1984. This ranged from a low of 0.4 percent in Halton to a high of 4.2 percent in Sault Ste. Marie.

### Family Benefits

Family Benefits statistics cover the same units as General Assistance, but with the addition of unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in September 1984 was 145,495 or 8.1 percent higher than in September 1983. More specifically, there was a substantial increase among recipients covered under the Guaranteed Annual Income System (GAINS), ranging from 10.4 percent for singles to 17.9 percent for couples. This was at the expense of the category without GAINS which showed declines of 2.4 percent for singles and 7.4 percent for couples.

Twelve-months cumulative expenditures ending September 1984 amounted to \$730.3 million or 15.4 percent more than the previous 12 months ending September 1983.

The overall average of beneficiaries as a percentage of the population in Ontario was 3.1 percent in September 1984. This ranged from a low of 1.2 percent in Halton and York to a high of 7.1 percent in Manitoulin and Nipissing (excluding North Bay). In the largest administrative units, Toronto, at 3.1 percent, was at the provincial average, Ottawa-Carleton at 2.5 percent, was slightly below the provincial average, and Hamilton-Wentworth, at 4.2 percent, was well above.

The combination of Family Benefits and General Welfare Assistance beneficiaries as a percentage of the population in Ontario refers only to the 54 largest units covered in the General Assistance Section. In September 1984, the overall average was 5.0 percent, ranging from a low of 1.7 percent in Halton to a high of 10.6 percent in Nipissing (excluding North Bay).

### Child Welfare

In September 1984, the children in care numbered 10,830 or 3.7 percent less than in September 1983. Children under protection and prevention services also showed a decrease of 1.3 percent.

Distribution of children by wardship showed declines of 5.0 and 5.8 percent in crown wards and non-wards respectively; while society wards increased by 2.2 percent.

A breakdown of the 51 societies showed an average of 0.5 percent of children in care of the estimated population under the age of 18. The Northern Region, at 0.7 percent, was above the provincial average, the Southwestern Region, at 0.4 percent, was slightly below, and the Central and Southeastern Regions, both at 0.5 percent, were at the provincial average.

When protection and prevention services on children were included, the beneficiaries as a percentage of total estimated population ranged from a low of 0.1 percent in York to a high of 1.5 percent in the Toronto Jewish Family and Children Services. The overall average was 0.5 percent.

## PART I

### GENERAL WELFARE ASSISTANCE

#### Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 86 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This presents more reliable comparisons than the respective comparisons of individual months in other tables.

All tables in this part are based on unaudited figures as provided by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

## PART II

### FAMILY BENEFITS

#### Notes

The Family Benefits Act is administered directly by the Ministry and covers people who are likely to need long term social assistance. This programme includes the disabled and families where the father is absent or disabled.

The tables give figures for the same municipal units which cover about 86 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e. all family members who are included in the payment calculations. Foster Parents are not counted as beneficiaries but are providing care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under- and overpayments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Please Note: Effective with the publications beginning April to June 1983, the four work incentive program tables published in the past will not be included as the information is currently unavailable.

## PART III

### CHILD WELFARE

#### Notes

The Child Welfare Act is administered by the 51 Children's Aid Societies with funds from the provincial and municipal governments. Generally, each Society serves one or more counties or districts, with the exception of Cochrane where two Societies, Kapuskasing C.A.S. and Porcupine C.A.S., serve the District. The other exceptions are Essex, Hamilton and Toronto each having second societies which are Catholic. Toronto also has a third society which is the Jewish Family and Child Services.

Beginning with the January-March 1982 Bulletin, Child Welfare data is now being extracted from reports provided by the C.A.S. Quarterly Reporting System, which replaces the now obsolete C.A.S. monthly statistical report (form V).

All tables are subject to later corrections and adjustments, and should be read as approximations which give general indications of volumes and trends.

## HIGHLIGHTS

### General Assistance

General Assistance data provided in the Bulletin cover municipalities with populations in excess of 20,000 and all county and district administration boards. Together, they account for about 86 percent of the total caseload in Ontario.

The caseload in December 1984 was 96,035 or 2.5 percent lower than in December 1983. The largest decreases were reported in the employable category, showing 2.9 percent for single males, 9.0 percent for male headed family units and 4.4 percent for female headed family units. Single females showed an increase of 1.2 percent. In the unemployable category, there were declines of 5.3 percent among female headed family units and 0.4 percent for single females. A moderate increase (2.1 to 2.4) was reported among the other groups.

Twelve-months cumulative expenditures ending December 1984 amounted to \$398.4 million or 5.1 percent more than the previous twelve months ending December 1983.

The breakdown by the Ministry's four regional offices showed increases in quarterly averages of beneficiaries of 2.0 percent in the Northern Region and 2.1 percent in the Central Region. Decreases of 0.1 percent were reported in the Southeastern Region and 3.5 percent in the Southwestern Region. The overall decrease in beneficiaries was 1.9 percent. The expenditures, however, showed much higher increases in all regions, the largest (11.4 percent) being in the Northern Region and the lowest (4.4 percent) being in the Southwestern Region. Total quarterly expenditures increased by 6.1 percent.

Supplementary Aid showed an overall decrease of 20.4 percent in quarterly averages of beneficiaries. The regional breakdown reported increases of 11.9 percent in the Central Region and 35.7 percent in the Northern Region. Decreases of 7.0 percent were reported in the Southwestern Region and 42.3 percent in the Southeastern Region. Total quarterly expenditures increased by 11.1 percent.

Quarterly averages of beneficiaries under the Special Assistance program showed an overall increase of 0.7 percent. Increases were reported in the Southeastern Region at 5.3 percent, the Northern Region at 15.9 percent and the Central Region at 17.5 percent. The Southwestern Region reported a decrease of 0.8 percent. Total quarterly expenditures increased by 17.4 percent.

In relation to the population in Ontario, General Assistance beneficiaries constituted an average of 2.0 percent in December 1984. This ranged from a low of 0.5 percent in Halton to a high of 4.4 percent in Sault Ste. Marie.

### Family Benefits

Family Benefits statistics cover the same units as General Assistance, but with the addition of unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in December 1984 was 146,798 or 7.1 percent higher than in December 1983. More specifically, there was a substantial increase among recipients covered under the Guaranteed Annual Income System (GAINS), ranging from 9.7 percent for singles to 16.9 percent for couples. This was at the expense of the category without GAINS which showed declines of 0.1 percent for singles and 12.9 percent for couples.

Twelve-months cumulative expenditures ending December 1984 amounted to \$753.6 million or 14.9 percent more than the previous 12 months ending December 1983.

The overall average of beneficiaries as a percentage of the population in Ontario was 3.1 percent in December 1984. This ranged from a low of 1.2 percent in Halton to a high of 7.0 percent in Nipissing (excluding North Bay). In the largest administrative units, Toronto, at 3.1 percent, was at the provincial average, Ottawa-Carleton at 2.5 percent, was slightly below the provincial average, while Hamilton-Wentworth, at 4.2 percent, was well above.

The combination of Family Benefits and General Welfare Assistance beneficiaries as a percentage of the population in Ontario refers only to the 54 largest units covered in the General Assistance Section. In December 1984, the overall average was 5.2 percent, ranging from a low of 1.7 percent in Halton to a high of 11.1 percent in Nipissing (excluding North Bay).

### Child Welfare

In December 1984, the children in care numbered 10,754 or 2.4 percent less than in December 1983. Children under protection and prevention services also showed a decrease of 1.3 percent.

Distribution of children by wardship showed declines of 6.8 and 1.0 percent in crown wards and non-wards respectively; while society wards increased by 5.0 percent.

A breakdown of the 51 societies showed an average of 0.5 percent of children in care of the estimated population under the age of 18. The Northern Region, at 0.7 percent, was above the provincial average, the Southwestern Region, at 0.4 percent, was slightly below, and the Central and Southeastern Regions, both at 0.5 percent, were at the provincial average.

When protection and prevention services on children were included, the beneficiaries as a percentage of total estimated population ranged from a low of 0.2 percent in York to a high of 1.3 percent in the Peel and Prince Edward. The overall average was 0.6 percent.

## PART I

### GENERAL WELFARE ASSISTANCE

#### Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 86 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This presents more reliable comparisons than the respective comparisons of individual months in other tables.

All tables in this part are based on unaudited figures as provided by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

## PART II

### FAMILY BENEFITS

#### Notes

The Family Benefits Act is administered directly by the Ministry and covers people who are likely to need long term social assistance. This programme includes the disabled and families where the father is absent or disabled.

The tables give figures for the same municipal units which cover about 86 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e. all family members who are included in the payment calculations. Foster Parents are not counted as beneficiaries but are providing care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under- and overpayments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Please Note: Effective with the publications beginning April to June 1983, the four work incentive program tables published in the past will not be included as the information is currently unavailable.

## PART III

### CHILD WELFARE

#### Notes

The Child Welfare Act is administered by the 51 Children's Aid Societies with funds from the provincial and municipal governments. Generally, each Society serves one or more counties or districts, with the exception of Cochrane where two Societies, Kapuskasing C.A.S. and Porcupine C.A.S., serve the District. The other exceptions are Essex, Hamilton and Toronto each having second societies which are Catholic. Toronto also has a third society which is the Jewish Family and Child Services.

Beginning with the January-March 1982 Bulletin, Child Welfare data is now being extracted from reports provided by the C.A.S. Quarterly Reporting System, which replaces the now obsolete C.A.S. monthly statistical report (form V).

All tables are subject to later corrections and adjustments, and should be read as approximations which give general indications of volumes and trends.

## HIGHLIGHTS

### General Assistance

General Assistance data provided in the Bulletin cover municipalities with populations in excess of 20,000 and all county and district administration boards. Together, they account for about 86 percent of the total caseload in Ontario.

The caseload in March 1985 was 101,651 or 3.6 percent lower than in March 1984. The largest decreases were reported in the employable category, showing 5.1 percent for single males, 3.1 percent for single females, 10.4 percent for male headed family units and 6.9 percent for female headed family units. In the unemployable category, there was a 2.8 percent decline among female headed family units and a moderate increase (1.0 to 2.2 percent) among other groups.

Twelve-months cumulative expenditures ending March 1985 amounted to \$405.6 million or 5.1 percent more than the previous twelve months ending March 1984.

The breakdown by the Ministry's four regional offices showed decreases in quarterly averages of beneficiaries in all regions, ranging from a low of 6.7 percent in the Southwestern Region to a high of 1.3 percent in the Northern Region. The overall decrease in beneficiaries was 4.9 percent. The expenditures, however, showed increases in all regions, the largest (21.7 percent) being in the Southeastern Region and the lowest (0.9 percent) being in the Southwestern Region. Total quarterly expenditures increased by 6.6 percent.

Supplementary Aid showed an overall increase of 0.8 percent in quarterly averages of beneficiaries. The regional breakdown reported increases of 2.7 percent in the Northern Region and 24.7 percent in the Southeastern Region. Decreases of 10.0 percent and 8.0 percent were reported in the Southwestern Region and Central Regions respectively. Total quarterly expenditures increased by 14.6 percent.

Quarterly averages of beneficiaries under the Special Assistance program showed an overall increase of 3.9 percent. Decreases were reported in the Southwestern Region at 7.2 percent, the Southeastern Region at 6.8 percent and the Northern Region at 4.2 percent. The Central Region reported a 9.3 percent increase. Total quarterly expenditures decreased by 7.7 percent.

In relation to the population in Ontario, General Assistance beneficiaries constituted an average of 2.1 percent in March 1985. This ranged from a low of 0.5 percent in Halton and Perth to a high of 4.3 percent in Sault Ste. Marie.

### Family Benefits

Family Benefits statistics cover the same units as General Assistance, but with the addition of unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in March 1985 was 148,359 or 5.6 percent higher than in March 1984. More specifically, there was a substantial increase among recipients covered under the Guaranteed Annual Income System (GAINS), ranging from 7.5 percent for singles to 12.8 percent for couples. This was at the expense of the category without GAINS which showed an increase of 3.2 percent for singles and a decline of 5.4 percent for couples.

Twelve-months cumulative expenditures ending March 1985 amounted to \$775.8 million or 14.0 percent more than the previous 12 months ending March 1984.

The overall average of beneficiaries as a percentage of the population in Ontario was 3.2 percent in March 1985. This ranged from a low of 1.2 percent in Halton to a high of 7.0 percent in Nipissing (excluding North Bay). In the largest administrative units, Ottawa-Carleton at 2.5 percent, was slightly below the provincial average, Hamilton-Wentworth, at 4.3 percent, was well above, and Toronto at 3.2 percent was at the provincial average.

The combination of Family Benefits and General Welfare Assistance beneficiaries as a percentage of the population in Ontario refers only to the 54 largest units covered in the General Assistance Section. In March 1985, the overall average was 5.3 percent, ranging from a low of 2.0 percent in York to a high of 11.0 percent in Nipissing (excluding North Bay).

### Child Welfare

In March 1985, the children in care numbered 10,891 or 4.2 percent less than in March 1984, while children under protection and prevention services increased by 1.6 percent.

Distribution of children by wardship showed declines of 6.7 and 6.4 percent in crown wards and society wards respectively; while non-wards increased by 2.1 percent.

A breakdown of the 51 societies showed an average 0.5 percent of children in care of the estimated population under the age of 18. The Northern Region, at 0.7 percent, was above the provincial average, the Southwestern Region, at 0.4 percent, was slightly below, and the Central and Southeastern Regions, both at 0.5 percent, were at the provincial average.

When protection and prevention services on children were included, the beneficiaries as a percentage of total estimated population ranged from a low of 0.2 percent in York to a high of 1.4 percent in Prince Edward. The overall average was 0.6 percent.

## PART I

### GENERAL WELFARE ASSISTANCE

#### Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 86 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This presents more reliable comparisons than the respective comparisons of individual months in other tables.

All tables in this part are based on unaudited figures as provided by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

## PART II

### FAMILY BENEFITS

#### Notes

The Family Benefits Act is administered directly by the Ministry and covers people who are likely to need long term social assistance. This programme includes the disabled and families where the father is absent or disabled.

The tables give figures for the same municipal units which cover about 86 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e. all family members who are included in the payment calculations. Foster Parents are not counted as beneficiaries but are providing care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under- and overpayments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Please Note: Effective with the publications beginning April to June 1983, the four work incentive program tables published in the past will not be included as the information is currently unavailable.

## PART III

### CHILD WELFARE

#### Notes

The Child Welfare Act is administered by the 51 Children's Aid Societies with funds from the provincial and municipal governments. Generally, each Society serves one or more counties or districts, with the exception of Cochrane where two Societies, Kapuskasing C.A.S. and Porcupine C.A.S., serve the District. The other exceptions are Essex, Hamilton and Toronto each having second societies which are Catholic. Toronto also has a third society which is the Jewish Family and Child Services.

Beginning with the January-March 1982 Bulletin, Child Welfare data is now being extracted from reports provided by the C.A.S. Quarterly Reporting System, which replaces the now obsolete C.A.S. monthly statistical report (form V).

All tables are subject to later corrections and adjustments, and should be read as approximations which give general indications of volumes and trends.
